| 授業のねらいとカリキュラム上の位置付け(一般学修目標) / Course Objectives | 教育目標 / Educational Goals | | | | |
| <p>The background to the acceptance of “Sustainable Development (SD)” in the international community is the divergence of perceptions on environmental conservation between developed and developing countries, revealed at the Stockholm Conference (1972), and the global environmental problems that emerged in the late 1980s. In other words, SDs are necessary to consider the “needs” of future generations and developing countries based on the “limitations of environmental capabilities.”</p> <p>In order to implement these measures, it is necessary to understand the challenges faced by the international community, to examine the roles played by the international community, sovereign states, business sectors, private sectors, experts, etc., to establish “environmental governance” in international, national, interregional, and regional areas, and thus establish comprehensive “environmental governance.” Furthermore, this environmental governance must be implemented in accordance with various treaties and laws.</p> <p>This course aims to give students an understanding of such global, national, and local environmental governance and an overview of relevant treaties and legislation.</p> | | | | | |
| 達成目標 / Course Goals | | | | | |
| <ul style="list-style-type: none"> ・ Understanding the environmental challenges facing the international community. ・ Understanding the roles played by the international community, sovereign states, business sectors, private sectors, experts, and other actors, as well as their various initiatives. ・ Understanding the objectives of environmental laws, namely “sustainable development” and “realization of environmental public interests.” ・ Understanding basic environmental responsibility, environmental risk management, environmental governance, environmental administrative decisions, and environmental impact burden. | | | | | |
| 授業計画(授業の形式、スケジュール等) / Class schedule | | | | | |

| | |
|---|--|
| 1.Course Guidance; What is “ Sustainable Development ” ? 2.Problems of Climate Change and Other Global Environmental Crises 3.Actions by the National Government, Local Governments, Businesses, etc. to bring about Social Change (1) 4.Actions by the National Government, Local Governments, Businesses, etc. to bring about Social Change (2) 5.Efforts to bring about Social Change that begin with individuals 6.Activities for Reconstruction and Environmental Remediation after the Great East Japan Earthquake 7. Environmental Administrative Response to Coronavirus Disease (COVID-19) 8.各論 GHG Emissions in Japan, Biodiversity, Sound Material-Cycle Society, Atmospheric and Water Environments, and Environmental Risks of Chemical Substances. | |
| 授業時間外学修（事前・事後学修） / Independent Study Outside of Class | |
| Pre-class: Independent study for about two hours per class, including previewing the relevant sections of textbooks and examining recent developments. Post-class: Review the contents of the lecture while preparing reports, etc. This includes not only abstract conceptual understanding but also an examination of the various treaties and laws that support each actor ' s efforts in concrete activities. | |
| キーワード / Keywords | Sustainable development, Environmental law, Global environment |
| 履修上の注意 / Notices | This lecture will be provided in two languages, Japanese and English. |
| 教科書 / Required Text | |
| | |
| 参考書 / Required Materials | |
| | |
| 教科書・参考書に関するその他通信欄 | Ministry of the Environment(MoE), ANNUAL REPORT ON THE ENVIRONMENT IN JAPAN 2021 (2021) |
| 成績評価の方法 / Evaluation | Grading: Cumulative total score of short tests, reports, and/or presentations over eight lecture days. |
| 関連科目 / Related course | |
